## **DETAILED ACTION**

Claims 1-27 are pending in this application.

## Claim Rejections - 35 USC § 112

1. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

2. Claims 1-6, 9-13 are rejected under 35 U.S.C. 112, first paragraph, because the specification, while being enabling for para acetoaminophenol, does not reasonably provide enablement for nicotinic acid or amino acid or protein or DNA. The specification does not enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the invention commensurate in scope with these claims.

The definition of the organic compound is too broad and the instant specification is not enabled for all the organic compounds, some of the non-enabled examples are given supra.

Applicants may overcome this rejection by limiting the scope of the claims to the exemplified compounds.

- 3. The following is a quotation of the second paragraph of 35 U.S.C. 112:
  The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
- 4. Claims 2-8, 13, 19 and 27 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Application/Control Number: 10/666,543

Art Unit: 1621

These claims define n to be from about 9 to about 70, or to be approximately 9 etc. The integer is either 9 or 10, what is the meaning of about 9? Can it be 9.5 or 8.5? Likewise the range of integer can be 9-40 rather than about 40. About 40 renders the claims indefinite. Can it be 42.9 or 37.5?

## Claim Rejections - 35 USC § 102

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 6. Claims 1-6 are rejected under 35 U.S.C. 102(b) as being anticipated by WO 95/15997.

The reference in the abstract, teach a process of making an organic compound by reacting sulfonic acid ester with polyether in an inorganic metal ion, thus anticipating instant claimed process.

- 7. Claims **2** 14-18, 20-26 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
- 8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to SHAILENDRA KUMAR whose telephone number is (571)272-0640. The examiner can normally be reached on Mon-Thur 8:00-5:30, Alt Fri.

Art Unit: 1621

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Johann Richter can be reached on (571)272-0646. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
